

Fully biological sewage treatment system for domestic wastewater using the proven KLARO SBR process. Depending on the requirements there are different tank sizes and versions.

## KLARO One UP

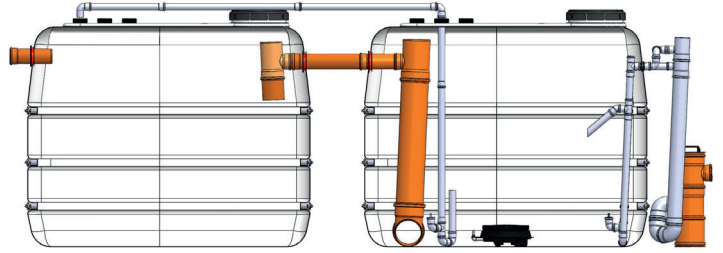

Small compact plant

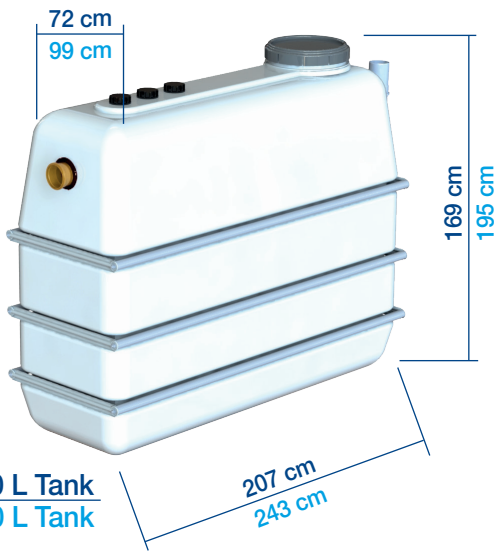

PE	Qd [l/d]	Bd [g/d]	Tank
3	450	180	2.000L
6	900	360	4.000L

## KLARO UP

With additional pretreatment and sludge storage

PE	Qd [l/d]	Bd [g/d]	Tank
5	750	300	2x 2.000L
10	1500	600	2x 4.000L

### Features

- Tank made from HDPE
- Overground installation
- For narrow space
- For small wastewater flows
- Low-priced

### Areas of application

- Where underground installation is not possible
- Houseboats
- Small companies
- Retrofitting existing overground plants
- For temporary use
- Experimental plant

Fish farm, Norway; 2018

Houseboat in Hamburg; 2019
